WORK EXPERIENCE

Full-Stack Web Developer Intern @ BioRender

Toronto, ON

Sep 2017 - Mar 2018

- > Coordinated with designers and other developers to build a full-stack **MERN** application that helps people create scientific figures, diagrams, and illustrations
- > Designed and implemented a feature that allows users to add geometric shapes, lines and arrows to their illustrations
- > Learned ways to manage time and meet deadlines in a fast-paced start-up environment
- > **Admitted into Y-Combinator batch W18**

PROJECTS

Memoire - Mobile Application

- > Developed a **React Native** mobile application with one other developer that helps users take notes about important people in their lives
- > Responsible for designing and developing the entire frontend of the application

Photosnap - Frontend Mentor Project

- > Built a marketing website for a photo-sharing application using **HTML**, **SCSS** and **JavaScript**
- > Learned ways to optimize layout and responsiveness by using tools such as **Flexbox** and **CSS Grid**

The Planets - Frontend Mentor Project

- > Built a multi-page website that showcases each planet in our solar system using **HTML**, **SCSS** and **JavaScript**
- > Refined skills in converting a given design into a fully interactive and responsive website
